Jim

Attached is EPA's response to the LWG's February 18, 2010 letter regarding proposed resolution of EPA's December 23, 2009 preliminary comments on the LWG's draft HH and Eco risk assessments. It addresses three outstanding issues - 1) identification of COCs, 2) comment #10 and 3) the directive nature of previous comments with regard to the risk assessments.

Please let us know if you have any questions.

thanks
Chip Humphrey
